

Proposal

11/10/2020

Project “Buddy” is our team’s new basic mood stimulator. This app is made to help you find a best way to keep you in a good mood. If 2020 was not easy for you and you had to spend a lot of time feeling overwhelmed “Buddy” is what you need.

“Buddy” is interactive app which reacts to your mood and finds right video for you to make it better. If you feel tired of working on your computer all day, it will tell you to take a break and will find perfect video for short workout or stretch exercises. Let’s say it is 5 PM and you are hungry. . . “Buddy” got your back! It will find perfect video how to make quick diner for you and your family.

We are using weather data and user impute to deliver emotional appropriate YouTube videos.

Sincerely,

Angelo Rocky Dibello,
Elie Dagher,
John Westermeyer,
Laurynas Juzva.
